Sequence 1, Application US/08583276
Patent No. 5837536
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Mienhuis, Arthur
APPLICANT: Toletoshev, Paul
TITLE OF INVENTION: IMPROVED EXPRESSION OF HUMAN
TITLE OF INVENTION: MILTIDRUG RESISTANCE GENES AND IMPROVED
TITLE OF INVENTION: SELECTION OF CELLS TRANSDUCED WITH SUCH GENES
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | GENERAL INFORMATION:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 1, Application US/09724753
Patent No. 6415953
GENERAL INFORMATION:
APPLICANT: Michael J. Heller
TITLE OF INVENTION: SELF-ORGANIZING MOLECULAR PHOTONIC
STRUCTURES BASED ON CHROMOPHORE-AND FUUROPHORE-CONTAINING
POLYNUCLEOTIDES AND METHODS OF
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 100.0%; Score 5; DB 3; Length lu;
100.0%; Pred. No. 3e+05;

OTHER INFORMATION: N-acetyl (2-aminoethyl) glycine backbone
RESULT 4
US-08-932-140C-6/c
i Sequence 6, Application US/08932140C
i Sequence 7, Application US/08932140C
i Patent No. 6300318
i GENERAL INFORMATION:
i TITLE OF INVENTION: Peptide Nucleic Acids Having
TITLE OF INVENTION: Antibacterial Activity
NUMBER OF SEQUENCES: 23
